Coin Operated Machines

Multiple Post Card Machine (Flat)

SIZE OF 36-WAY
Height 95 in.
Width 37 in.
Depth 37 in.
Ship. Wgt. 600 lbs.

Multiple Post-Card Machine. (Flat)

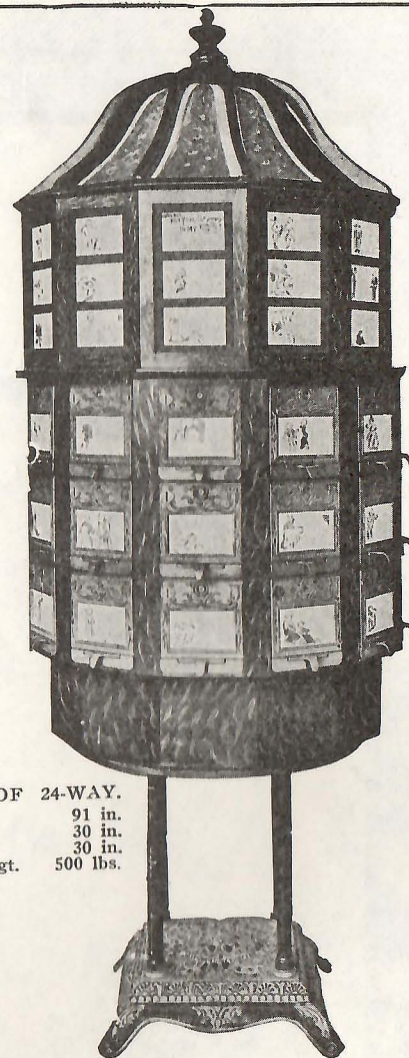

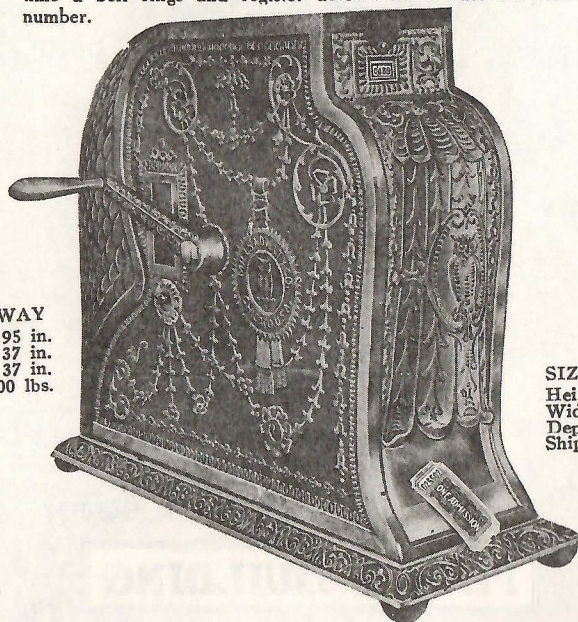

Every stationery and drug store, hotel lobby, etc., in the country should own a post-card machine. Displays the stock much more effectively, saves the clerk's time and prevents loss from much handling of the cards. Not only is it an attractive addition to the location, but you will find that it increases your sales fully 5%.

Multiple Post Card Machine is an especial favorite with our patrons. It comes in sizes, from one slot up to thirty-six slots.

National Coupon Register

Automatically clips and delivers to patrons, numbered coupon ticket from roll and keeps a record of all tickets sold.

The National simplifies the handling of a crowd by rendering quicker and better service to patrons. Keeps an absolute record of all tickets sold and money taken in. Prevents disputes, dishonesty or the reselling of tickets. Does away with counting and balancing of cash. Machine is beautifully finished in bronze and lacquer. Simple in construction and built for long and hard wear. To start it, remove cover, pull pin partly out, and slip coupon roll over it, set pin, slip the end of tape in the automatic feeder, then restore cover. When lever is pressed down, machine will clip off coupon and drop it on window sill. At the same time a bell rings and register automatically advances one number.

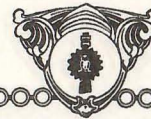

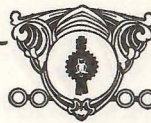

SIZE OF 24-WAY.
Height 91 in.
Width 30 in.
Depth 30 in.
Ship. Wgt. 500 lbs.

Multiple Post-Card Machine. (Round)

We carry a very large line of post-card machines and have selected the Round Multiple as especially adapted for the needs of the man whose space is limited.

Each compartment has its own coin slot, therefore, the machines require no attention from the clerk.

Can be furnished in several shapes and sizes from one to nine ways. The larger machines have a handsome magazine sign above, showing an attractive assortment of the cards. A durable and thoroughly well finished machine. Get our prices before purchasing a post-card machine.

You'll Get the Class of Trade You Want with Mills' Machines

Pneumatic Punching Bag

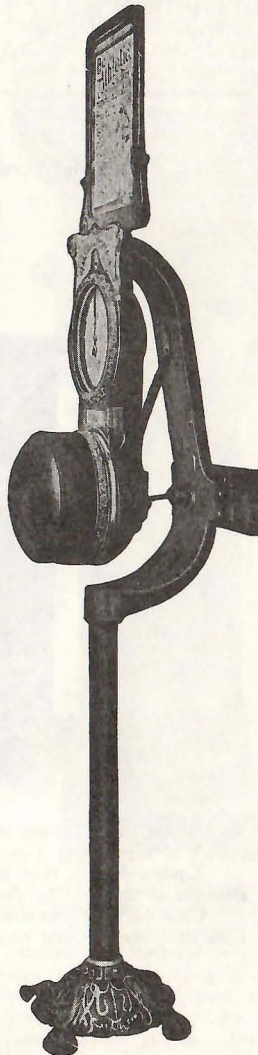

These two illustrations show clearly the Pneumatic Punching Bag. The most compact machine of its kind.

Punching Bag is equipped with the Mills' Patent Air Cushion covered with the finest grade of leather. Body of machine onto which the punching bag is attached, is hinged and fitted with a compressed air bumper, thus avoiding any possibility of injury to player. The frame is made entirely of iron with a large dial handsomely enameled in appropriate colors and which automatically registers force of blow.

A Bell rings when a certain number of pounds have been registered. This number can be changed at the discretion of proprietor by simply adjusting a screw. Entirely automatic. No push buttons or levers required.

A machine which has proven its earning capacity for thousands. Why not let it for you?

SIZE.	
Height	91 in.

Depth	17 in.
Ship. Wgt.	180 lbs.

New Vertical Punching Bag

Has Earned As High As \$15
In One Day

Don't waste a foot of space when a machine like this New Vertical Punching Bag can be had for so little and will pay such big rent.

Gets an enormous play, because every man wants to know how hard he can punch vertically, i.e.—straight down. Hence it is different.

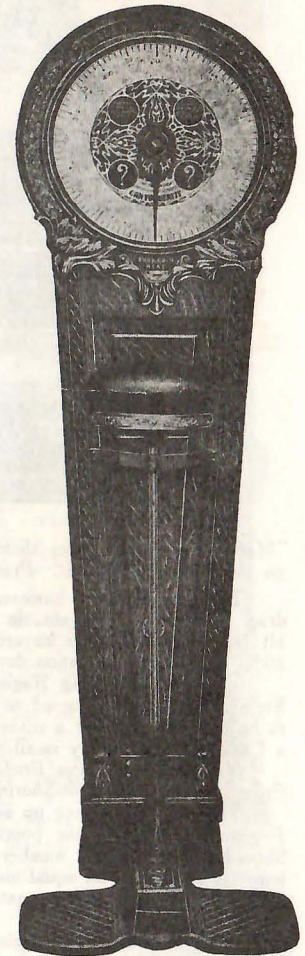

The Punching Bag is A1—made of the finest tanned horsehide and skillfully sewn to withstand the hardest continuous usage.

Requires no attention—the blow is struck after coin is dropped, registering automatically.

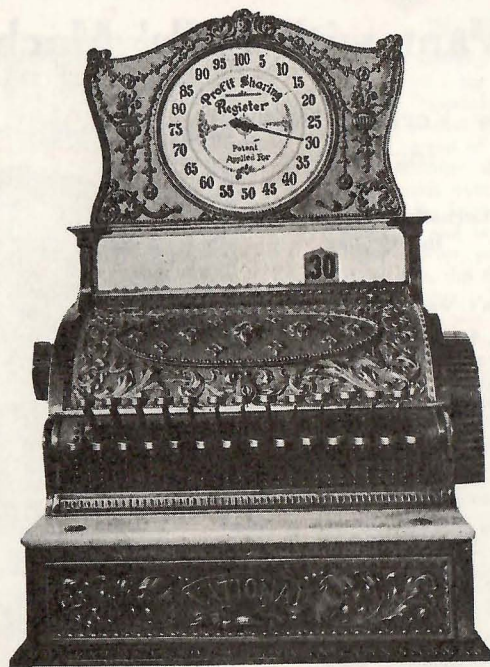

The machine is a beauty and a most attractive addition to any saloon, club, bowling alley or concession in which it may be placed. Natural oak trimmed with heavy nickel plate ornaments.

Handsome dial and extra heavy solid iron case. If the machine has taken in \$15 in a single day, you can judge how much it would earn for you in even one month.

Depth	28 in.
Ship. Wgt.	200 lbs.

Profit Sharing Register

"More effective than dice shaking, trading stamps, etc., etc. Keeps a check on the clerk or attendant. Prevents carelessness or dishonesty. Increases Sales.

This unique little business booster is needed in almost every saloon, drug, department store, etc., in the land. So constructed that it is free from all features which may be criticised and should increase sales by at least 20%, and cost of operation does not exceed 5%.

The Profit Sharing Register can be had in any one of three styles. Style A (Illustrated above) to be attached to top of Cash Register; Style B to be hung on wall by a silver chain and operated in connection with either a Cash Drawer or very small register, and Style C with double dials.

Note that cut shows Profit Sharing Register attached to Cash Register. Price includes the Profit-Sharing Register only.

When a sale is rung up on the cash register to which the Profit Sharing Register is attached, the pointer on dial of the latter automatically spins. Should Pointer stop at number corresponding to value of purchase, the customer is entitled to an equal amount in trade free. Thus in the hope of getting something for nothing, patrons soon come to concentrate their purchases with you.

The Profit Sharing Register is beautifully finished in your choice of gold, bronze, brass or nickel, or will be refinished to harmonize with your cash register without extra charge.

Operated by the ordinary electric lighting current. Necessary attachment can be made by a child. Simple, handsome, showy and profitable.

New "Owl" Searchlight and Chimes Lifting Machine

Better even than the well-beloved "Owl Lifter," because of the additional attractions in the shape of the searchlight and chimes features which we have incorporated therein. Extra strong for the hardest kind of service and thoroughly well finished in every detail.

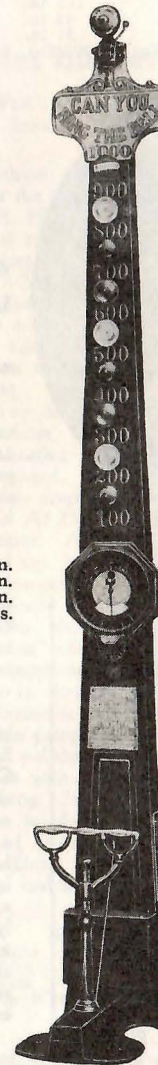

No. 85 Searchlight Lifting Machine

Has upright 9 feet high, carrying 9 colored electric lights with Bell on top. When coin is dropped and handle lifted these will automatically light up in succession.

No. 86 Chimes Lifting Machine

In height and construction it resembles No. 85, but has five colored lights, five chimes and bell on top. As lights are illuminated the bells ring. At the 1,000 mark all lights light up and the bell on top rings.

Balloon Lung Tester

Here's a machine bound to be popular, because of the interest everyone is taking in aviation just now. The entire device carries out the balloon idea, the lower section of cabinet representing the "basket" with crew aboard.

The object is to drive the small balloon in center section up to the moon. Should the player be successful the moon and stars light up, giving a very pretty effect to the scene. The novelty of the device attracts instant attention, and the machine is proving very profitable to those who already have it installed.

SIZE.
Height 105 in.
Width 46 in.
Depth 21 in.
Ship. Wgt. 275 lbs.

Rubberneck Lung Tester

A genuine fun-maker that surely gets the pennies. "Mr. Rubberneck" — eyeglass and all is "on the job." By blowing through tube his head is made to rise and twist from side to side.

At commencement of "blow" four incandescent bulbs are illuminated, the six lights of a miniature chandelier lighting up when 900 lbs. is reached. On top of machine appears a novel "Rubberneck Bally-Hoo" having three comical heads which are kept constantly "rubbering" by a clock-work mechanism running several hours without rewinding.

Interior decorations in upper section in strong, bas-relief. Handsomely polished quarter-sawed oak cabinet, ornamental and resting on four oxidized feet. Plate-glass front panel. Separate money box. Mechanism strong and easily accessible. Size 105x20x21, S. W. 340 lbs.

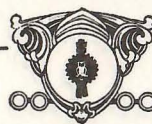

Lion Head Lung Tester

SIZE.
Height 103 in.
Width 29 in.
Depth 24 in.
Ship. Wgt. 250 lbs

Surmounting top of cabinet appears a beautifully modeled head of an African Lion life-size. On his breast appears a clock dial. The "second" hand automatically indicating the length of time blower can hold his breath.

When sufficient air has been blown in the Lion emits a loud roar, instantly attracting universal attention, and thereby inducing a much greater patronage for the machine. By a simple electrical connection the Lion's eyes are illuminated and made to sparkle brilliantly. Oak Cabinet with metal feet. Simple, handsome and profitable.

We Build to Order Special Machines for Your Special Needs

Weight Blower

Get the Crowd Laughing and They'll Stick.

You don't need us to tell you that a good Lung Tester will pay you, and this is a dandy machine.

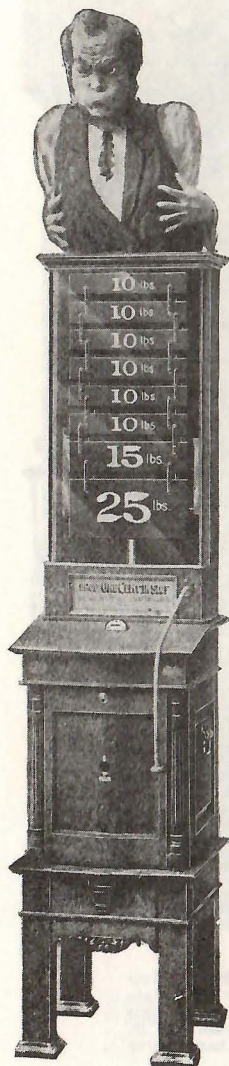

The life-size bust of a man with enormously expanded chest and grotesque features, surmounts the cabinet and never fails to attract the attention of every passer-by.

Enclosed behind a plate-glass front in the upper section of the cabinet, are a series of weights, eight in number. After the coin is deposited and the tube blown into by the player, the 25-pound weight moves up against the 15-pound weight and a still stronger blow pushes the two in turn against the third and so on until the top is reached.

This is a good big machine, constructed as well as we know how, and highly recommended by our customers.

SIZE.	
Height	102 in.
Width	18 in.
Depth	19 in.
Ship. Wgt.	240 lbs.

Gentlemen: The Grip and Lung Tester was an especial favorite with the public and was continually in operation.
(Signed) Lyman C. Fisher.

Hat Blower

Don't Wait Until the "Other Fellow" Installs This Machine.

A machine that looks worth more than the price we charge for it. Mr. R. Holliman says: "This is the best machine of its kind I have yet come across."

Under a heavy plate-glass panel, in the upper section, are shown eight very comical heads. Each of these are adorned with a movable hat with an appropriate inscription across rim.

As the air is blown through the flexible rubber tube, the pointer on the indicating bar in the center begins to ascend. At the 50-pound mark the hat drops from one of the heads, etc. At 250-pounds an electric bell rings. At 400 pounds, or when the top hat is blown off, the coin dropped in by the player is automatically returned.

Illustration shows the machine with "hats on" and with "hats off."

By an ingenious contrivance the air blown in through tube escapes through automatic valves connected to an inside pump.

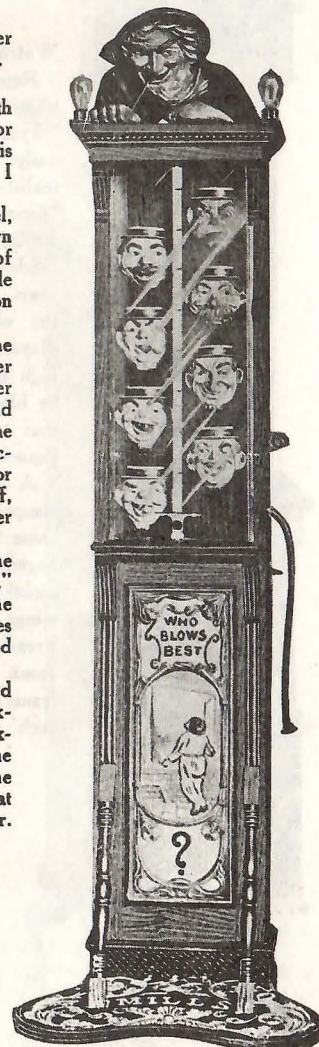

Highly polished quarter-sawn oak cabinet with oxidized or nickel-trimmed. Iron base made extra heavy to do away with the necessity of fastening the machine to floor. Don't overlook the Hat Blower in making out your order.

SIZE.	
Height	81 in.
Width	30 in.

Hats Off

Hats On

Skyscraper Lung Tester

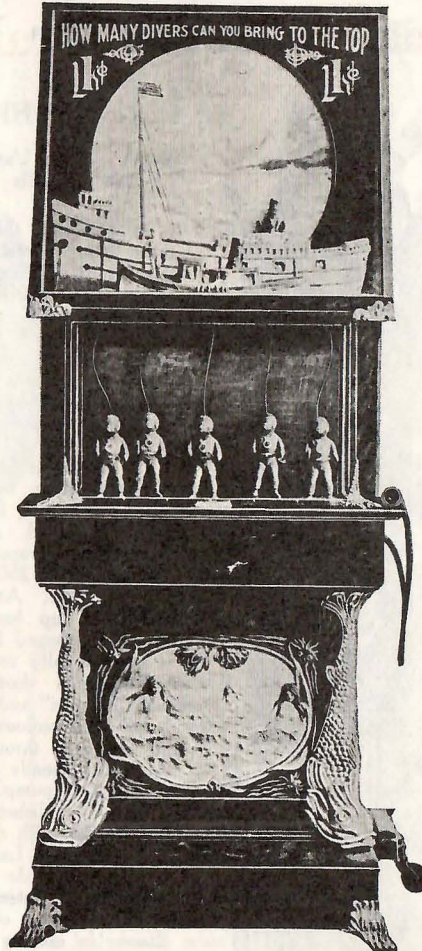

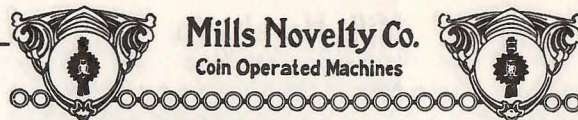

SIZE.
Height 100 in.
Width 18 in.
Depth 19 in.
Ship. Wgt. 265 lbs.

Watch "em Blow."

Represents the interior of a big city "skyscraper" ingeniously laid out in realistic looking "floors." An elevator lighted by an incandescent bulb appears in center and the object of the player is to see how high he can raise it by blowing into tube, thus testing his lung capacity.

A neat and very compact little machine finished in mahogany with polished nickel plated trimmings and heavy French plate-glass front. Attractive frame sign free with each machine.

"Submarine" Lung Tester

Upper section represents ocean-scene, with steamer and tug in foreground. Beneath this is a heavy plate-glass tank filled with water. Five deep sea divers connected with boat by air tubes stand at bottom of ocean ready to ascend when coin is deposited and tube blown. The purpose being to see how many can be brought to top. Interior decoration of alligators' heads, fish, mermaids, etc. Handsome polished cabinet. H. 76 in.; W. 31 in.; D. 17 in.; S. Wt. 300 lbs.

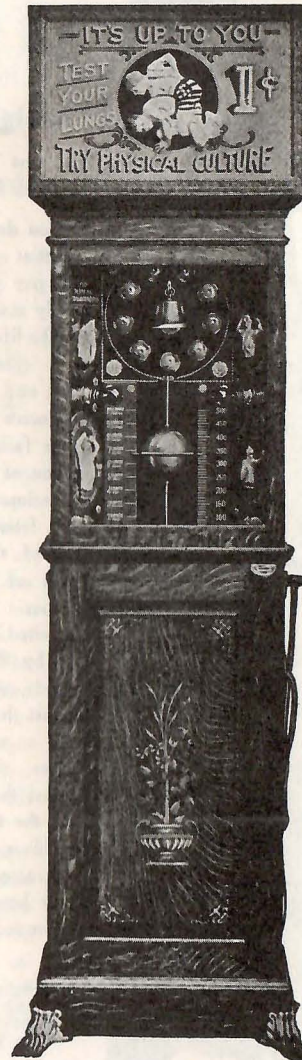

"High Ball" Lung Tester

Another new one—one maybe that will just fit your requirements, as it appeals especially to the sporting class. In the upper section of cabinet is a large nickel plated ball with projecting arms or indicators. Over ball is a circle of nine incandescent lights with bell in center. One of the bulbs lighting up at each additional 50 lbs. blown in, the bell ringing when 500 lbs. is reached.

Mechanism is thoroughly well constructed and easily accessible. Large Money Box with separate key. Non-clogging coin chute. Attractive framed sign with each machine free.

SIZE.

Height 94 in.
Depth 21 in.

Always a Good Margin of Profit in Fortune Telling Machines

Conjurer Fortune Teller

SIZE.
Height 77 in.
Width 28 in.
Depth 17 in.
Ship. Wgt. 200 lbs.

Conjurer Fortune Teller

Don't be afraid of trying something "different." In arcades, amusement parks, ice cream parlors, etc., a good fortune telling machine is an excellent drawing card. We have picked the "Conjurer" as the especially satisfactory machine.

The device has many novel features. Automatically answers questions relating to Love, Marriage, etc. Also shows picture of future life partner.

The dial is large and handsome and inscribed with various prophecies in center.

When indicator is set to question patron desires answered, the coin deposited, and handle pushed, the dial spins and the information requested is indicated.

Our Madam Neville Fortune Teller

A big handsome machine like this cannot be overlooked.

In the interior of the upper section of the highly polished oak cabinet sits the mystic Gypsy Fortune Teller—Madame Neville.

She is suitably attired in bright hued garments of rich material and her large eyes move automatically from side to side.

The machine is provided with two coin slots—one for men and one for women, and is operated by pressing down lever after coin is deposited when a chart showing the reproduction of a hand and bearing a printed palmistry reading will be automatically delivered. These readings relate to the past, present and future, and were prepared by a noted palmist.

Through the glass panel in lower section appears a candle, book, an owl and a skull denoting divination. Solid oak cabinet, metal trimmed.

"The machine I recently purchased from you has already paid for itself. The public takes to it finely."
"F. A. Getz."

Verbal Fortune Teller

"Wonderful Talking" Machine.
— Actually Answers Questions.
Astonishes All Beholders.
Draws a Heavy Play.

Our very handsomest fortune teller—a really beautiful and remarkably clever machine and the only device of the kind which actually "speaks" the prophesies.

The highly polished cabinet is carved to represent the front of a Romany Gypsy Cart. In the interior hung with rich Oriental draperies and softly illuminated with art glass lantern, sits the veiled Mystic beautifully garbed. When coin is deposited she slowly turns her head, moves tongue, rolls her eyes and speaks aloud the fortune in a clear feminine voice. The amazing life-likeness of her actions holds patrons spellbound, and there is invariably an awe-struck crowd around the machine.

Explanation. Two phonographs are concealed in the lower sections of cabinet. The records each contain eleven appropriate fortunes for, respectively, men and women. The dropping of coin sets in action mechanism controlling action of head, eyes and tongue, and starts phonograph.

The machine is equipped with our famous New Automatic Transmission Spring Speed Regulator and Automatic Return Device. Wired to operate with either direct or alternating electric current and provided with wheels to facilitate moving about. Made for either nickels or pennies. A truly magnificent machine.

Famous Sibille Fortune Teller

One of the most attractive fortune tellers obtainable. In the upper section of the cabinet richly carpeted and hung with Oriental draperies sits Sibille—Queen of Hearts, attired in the luxurious garments of the East. From a jeweled diadem fall filmy veils of gauze half concealing her face and form. The whole softly illuminated by colored incandescent bulbs.

As coin is dropped Sibille's right hand covers last fortune shown. Bowing slowly she raises her hand to allow a new "hand" of playing cards to appear. Simultaneously a card bearing a printed reproduction of this "hand" and also a clever fortune is thrown into the cup in front of machine. Additional cards can be obtained at small cost. 1,200 cards are furnished with each machine.

The outer case of the Sibille is remarkably handsome, made of highly polished mahogany with beautifully decorated glass signs, nickeled ornaments and handles with handsome antique shield.

The mechanism is strong and not liable to get out of order. Money box is separate and has an individual key. Made for nickels or pennies. In ordering state which is desired.

Gentlemen: Your sight draft in amount \$100.00 was paid on the 22nd inst., at the First National Bank of Glenwood Springs. The Dewey Jack-Pot has taken in \$100.25 already.
(Signed) Sheldon & Staley.

Waste Space — Use It

Look around you! Isn't there a little unoccupied place on your counter, into which a match or peanut machine would just fit? And there by the door wouldn't a good scale get a number of pennies now getting away from you? Little things, yes, but steady money makers and profits that are now getting away from you.

The wisdom of the stars is made known through this machine. In middle section are four coin slots, one for each season of the year. By dropping coin in slot opposite the birth month of the player and pushing lever the machine will automatically deliver a card printed with the player's complete horoscope. An excellent choice for arcades, waiting rooms, etc., which never fails to draw custom—enlarge receipts.

Gentlemen: I received my Mills' Match Vender Machines, and placed them in operation. They are fine money getters and the best venders I ever saw at the price.

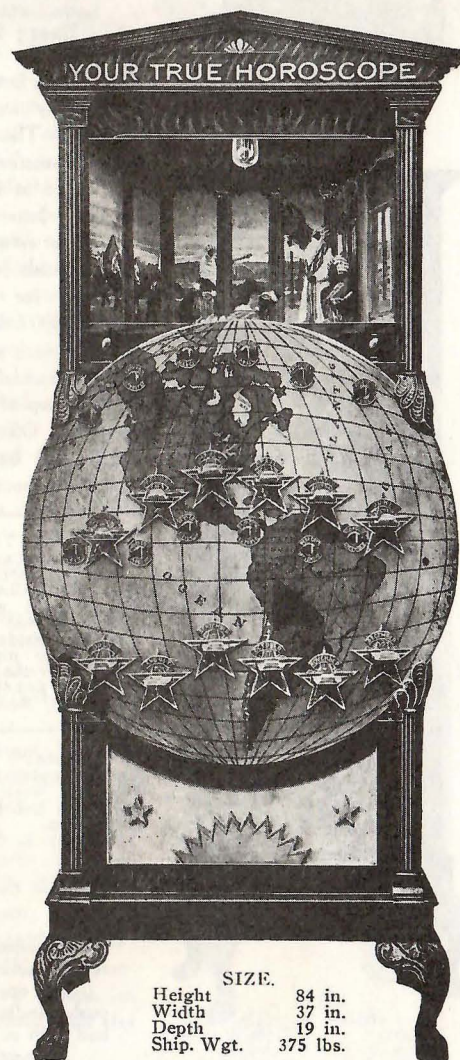

(Signed) Wm. Crippen.

Mills' New World Horoscope

Remember we are continually adding new machines to our already very large line. If what you desire is not listed here write us. We have it or can build it for you.

A stately looking fortune teller which will get attention anywhere. Through the plate-glass panel in the upper section is visible the portico of an Egyptian castle with a glimpse of Arabs mounted on camels and moonlit pyramids in the rear. The scene is illuminated by an incandescent bulb. Directly below appears an immense globe representing the Western Hemisphere. Across this are arranged 12 stars representing the different months of the year. In the center of each is a slot with a steel plunger.

Operation. The player desiring his fortune told deposits his coin and pushes plunger on the star representing his birth month. The machine then delivers a carefully written printed horoscope. The New World can be readily attached to any electric light socket. Is unusually handsome in appearance and will withstand long and constant wear without getting out of order. Made either for nickels or pennies.

Cupid Post Office

**Automatically Delivers
a Highly Interesting
Love Letter on
Every Coin**

This "love letter" machine is especially well liked by the ladies. The front of the device represents a post office with Cupid at the window. "Private" letter boxes are ranged on either side. A clever written love letter is delivered for each coin played, 1,000 being furnished free with each machine. A large ornamental heart ornaments the top of cabinet and the "Post Office" is thoroughly well built and finished throughout.

Gentlemen: The Dewey is certainly a great invention. I set the machine working in the Elks' Club Room last Friday night and Monday noon I opened it. It had then run Friday, Saturday and Sunday nights, and I took out for the three nights a total of \$43.40.

(Signed) Edmund Burke.

Gentlemen: The Mills' Match Vender is a winner. The first week it took in \$4.78. It has given perfect satisfaction.

(Signed) L. E. Kampf.

Mills Novelty Co.
Coin Operated Machines

WIZARD

Wizard Fortune Teller

Another machine operators highly recommend. Automatically answers questions relating to love, travel, marriage, etc., and also shows picture of future spouse.

To operate, deposit coin, turn indicator opposite question desired answered and push handle on side. Dial then revolves and answers appear. The Wizard can be had with or without stand, and is thus adapted for counter use.

Remember that these fortune telling machines are permitted *everywhere*. They are always popular with the young people of either sex. Size 18x11x10, S. W. 65 lbs.

Jumbo Success
Fortune Teller

**Novel—Profitable
Durable**

A machine resembling our famous Jumbo Success Card Machine in appearance, and one of the best low-priced fortune telling devices made. Revolving reels are inscribed with prophecies relating to love affairs, business prospects, etc., etc., provoking genuine interest and fun. Best operated in pairs—one for men and one for women. A good looking machine for little money. Occupies little space. Furnished with handsome sign.

Gentlemen: The Operator's Bell Machine which I bought from you, is the best money-maker I ever had. I have had it some time now and it is making me about \$50.00 a week.

(Signed) W. C. Jackson.

Gentlemen: In regards to the 20th Century Check Machine, I want to say it makes good money every day and has never been out of order. Gets a good play and makes money.

(Signed) Charles Lang.

Automatic Bar

Automatic Bar

A practical novelty which *does away with the necessity for an attendant*, as patrons wait on themselves. In Department and Commissary stores, Arcades, Concessions, etc., the Automatic Bar will not only prove a money-maker, but by dispensing with the need of employing help actually *saves its own cost*.

Can be had in any number of sections, from one to six. One section for each kind of drink. The machine is operated by dropping coin, pushing knob and turning handle. The regulation quantity of liquid is then automatically dispensed and the supply automatically shut off *without a drip*.

All metal parts coming in contact with liquid are non-corrosive and the machine is absolutely sanitary and can easily be kept clean. The large asbestos lined icebox holds about 400 pounds of ice. The mechanism is in every way up to the Mills Standard and the machine *cannot* be manipulated.

There is nothing susceptible to wear in the Automatic Bar and the device should last for years. Figuring the wages of an attendant at \$15 a week, you can readily see how the Bar will prove a very profitable investment indeed.

In Ordering, state how many drinks you wish to vend, their names, and what coin you wish each beverage vended for. Illustration shows our six-section Bar open. Size, six-slot—H. 105 in.; W. 112 in.; D. 26 in.; S. Wt. 1100 lbs.

Doctor Vibrator

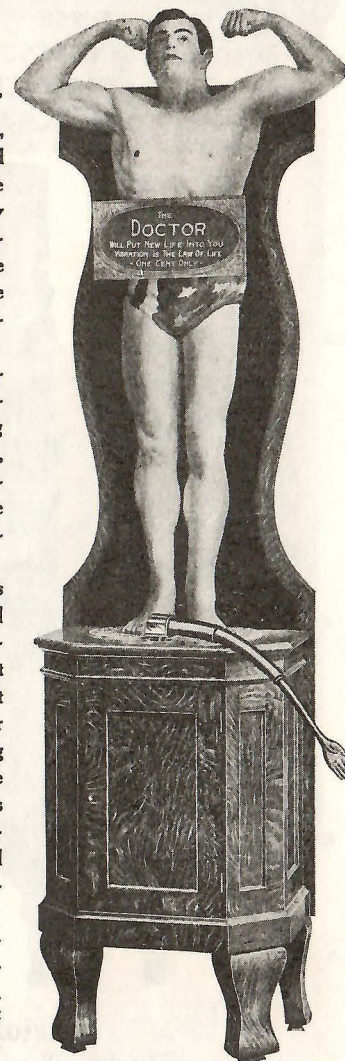

Doctor Vibrator

Every "museum," Penny Arcade, etc., in the country should own one of these practical and highly profitable penny Electric Machines. We have selected the "Doctor" as specially desirable.

The machine immediately attracts attention—representing a well developed, life-sized man standing on a handsome polished oak pedestal.

The machine costs little to operate and is wired for connection with either direct or alternating current (in ordering state for which desired, giving voltage, etc.) The "Doctor" administers a pleasant, invigorating "treatment," and is endorsed by physicians.

Current is automatically shut off, after each treatment. The mechanism of the machine is of superior construction and should last for years.

No. 3

Illusion Machine

A clever novelty that will surely catch the crowd. By an ingenious arrangement of lenses and reflectors, the player looking into the machine gradually beholds his features undergoing a most remarkable transformation—differing in each of the three machines. In No. 1—*As You Were*, his image at the further end of the funnel-shaped opening gradually changes into that of a baboon. In No. 2—*As You Are*. He is horrified to see himself a lobster, while No. 3—*As You Will Be*. Discloses the effect of time's handiwork—a skeleton. Wired for connection with the ordinary electric lighting current, thus doing away with the annoyance of storage batteries. Sections with the exception of signs, are uniform in appearance. Framed sign free with each machine.

Eagle

A miniature Pilot with the exception that it has five instead of six coin slots, and is for quarters instead of nickels, paying correspondingly larger rewards ranging from 50c to \$5.00.

In appearance the "Eagle" closely resembles the "Pilot." Equipped with five pay-out tubes containing the following trade checks: 75 \$1.25 checks, 55 \$2.50 checks, and 45 \$5.00 checks. Full equipment of checks furnished free with each machine.

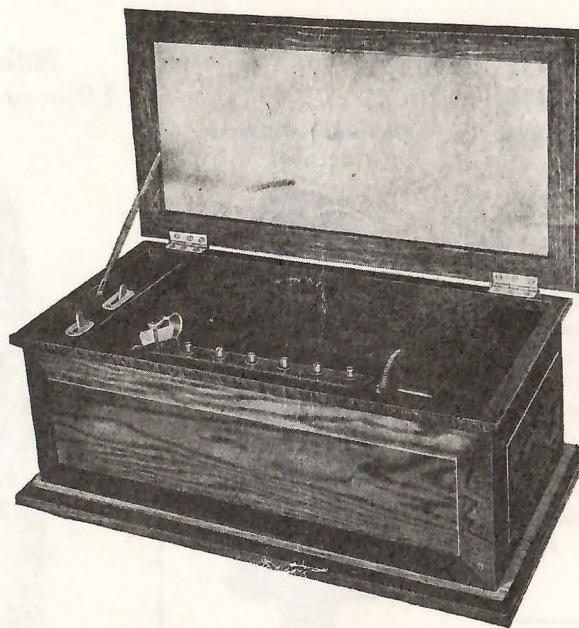

Size, Ht. 15 in., Wdt. 12 in., Dpt. 11½ in. S. W. 58 lbs.

Bally-Ho

Swiss Music Box

We know of no better device that can be obtained anywhere for the price than our Swiss Music Box. Gives unqualified satisfaction and plays eight beautiful tunes. The "works" are the genuine dependable Swiss article especially imported by ourselves. Solid oak case, highly finished. Costs little. Worth much more than we charge.

Bally-Ho

Takes the place of a "Barker" at moving picture shows, arcades, etc., a great saving in expense.

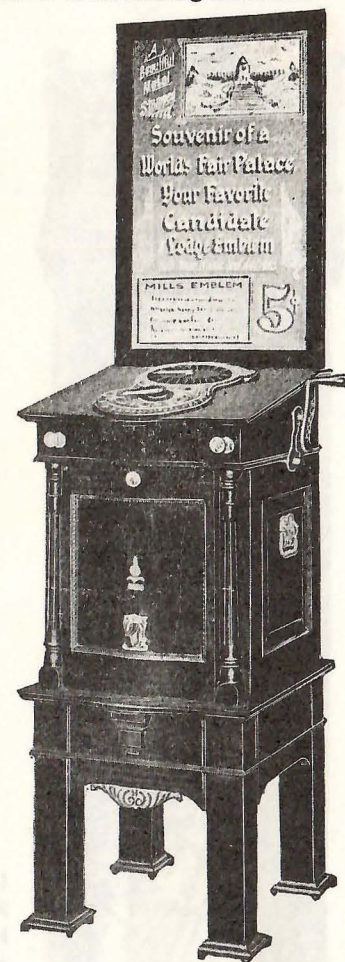

In the cabinet, enclosed on the three sides with heavy plate-glass, stands a handsome band soloist in the striking gold-trimmed uniform of Sousa's Band.

Expanding his chest and rolling his eyes, he executes a bugle call on the cornet he carries at regular intervals.

The Device is entirely automatic and operated by the electric lighting current (either direct or alternating. In ordering state which is used.) It is equipped with an Automatic Transmission Spring Speed Regulator, guaranteed to take up a variation of 50% in the current, thus insuring uniformity of tone. As each solo ends, feed nut is automatically released allowing reproducer to be pulled back to starting point.

The Bally-Ho is not only a money-saver, but a first-class advertisement for your business. Try it and see.

Emblem Embossing Machine

Automatically prints and delivers an aluminum emblem the size of a half-dollar for a nickel. Holds about 600 of these emblems nicely stamped with embossed design, picture, etc. Player selects Emblem desired (6 styles to choose from) turning indicator thereto, deposits his coin and spells out name, address, etc., he desires to have. Size, 73x22x23 in.; S. Wt., 200 lbs. 1,000 emblems free with each machine. Additional supplies at low cost.

"Lady" Perfume Sprayer

Mills Liberty Bell

Literally four machines in one, the fore-runner of the renowned Operator's Bell and all the successful gum vending machines. First: Can be operated with nickels or checks and will pay rewards automatically in 5c checks. Secondly: Can be operated with coins exclusively and pay in nickels only. Third: With 5c checks, paying out in checks. Fourth: As a plain trade card machine by simply closing up pay-out tube.

The Liberty Bell is too well known to need any reference to its earning capacity. It is better adapted to the requirements of a larger class of operators than any machine ever built.

In the twinkling of an eye, it can be changed from a trade Stimulator to a Money or Check Machine. The layout of reels and reward cards is peculiarly effective. The mechanism is famous for its matchless simplicity and durability. Solid metal case, handsomely finished. Size 22x13x12, S. W. 118 lbs.
